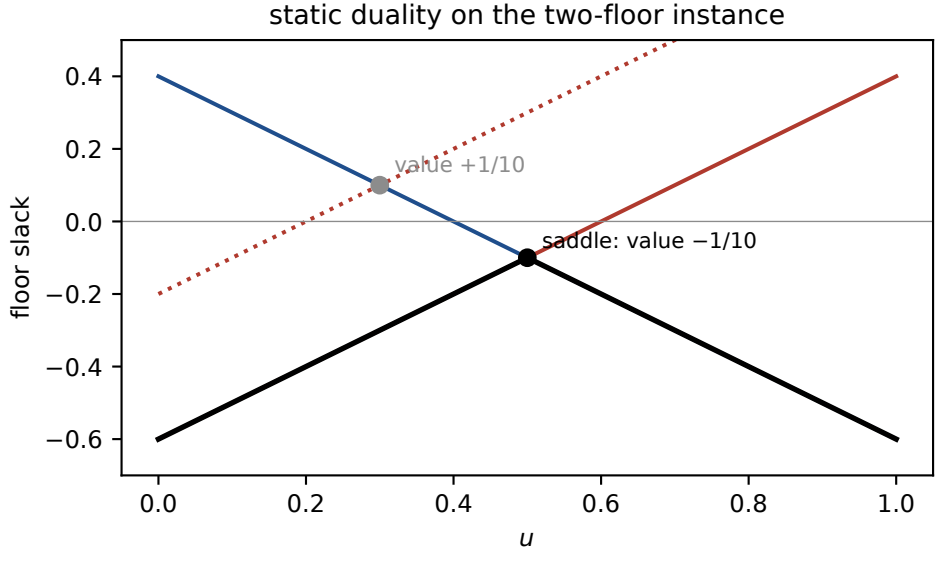
benchmark fibre: crossover and margin law
cap sum
pressure Y
$Y^* = 27/5$
deficiency $2\mu(Y)$
Y=6: cap sum 47/25, margin 3/50
$c_1(Y) + c_2(Y)$
demand 2



static duality on the two-floor instance
floor slack
u
value +1/10
saddle: value −1/10
$r_1 = 2/5 - u$
$r_2 = u - 3/5$
$\min_j r_j$
feasible contrast $u - 1/5$
