(a) J-17 recharge is near-white
$r(R_t, R_{t-1}) = 0.17$
R_t (10^3 acre-ft)
R_{t-1} (10^3 acre-ft)
(b) the head increment tracks same-year recharge
$r(\Delta H_t, R_t) = 0.74$
ΔH_t (ft)
R_t (10^3 acre-ft)
(c) when climatology overtakes persistence
Edwards J-17 (observed)
J-17, stationary prediction $\sqrt{2(1-\rho_h)}$
Northern cod, Spec. A
Northern cod, Spec. B
RMSE(persistence) / RMSE(training mean)
horizon h (years)
