

ONE NUMBER FROM MANY CAPITALS

composite assessment practice

compensatory aggregation

a deficit in one capital can hide
behind a surplus in another

floors are typed, per moiety

THE WITNESS

aggregate passes · a floor fails

aggregate floor ≥ 0

for every weight ≥ 0

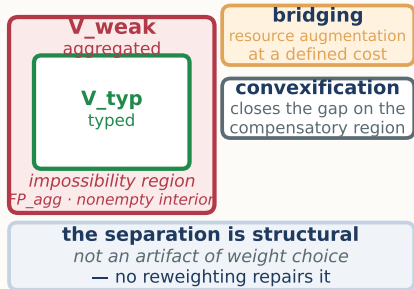

typed floors (schematic)

on an explicit rational witness

no single action keeps every
typed floor nonnegative

THE SEPARATION

$V_{\text{weak}} \supset V_{\text{typ}}$

**The Limits of Compensatory Aggregation:
A Formal Separation of Weak and Strong Sustainability Assessment**
