

ONE NUMBER FROM MANY CAPITALS

composite assessment practice

behind a surplus in another
a deficit in one capital can hide
compensatory aggregation

floors are typed, per moiety

THE WITNESS

aggregate passes · a floor fails

for every weight ≥ 0
aggregate floor ≥ 0

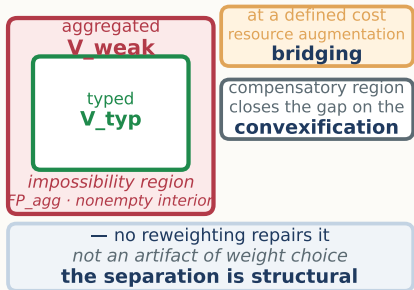

typed floors (schematic)

typed floor nonnegative
no single action keeps every
on an explicit rational witness

THE SEPARATION

$V_{\text{weak}} \supset V_{\text{typ}}$

**The Limits of Compensatory Aggregation:
A Formal Separation of Weak and Strong Sustainability Assessment**
